

Hacksaw Blades 300 mm 18TPI Teeth 10Pk

Product Images

Short Description

10 pack of 300mm long hacksaw blades with 18TPI teeth, suitable for use with standard hacksaw frames.

Description

The coarseness of a hacksaw blade is measured by the TPI or number of Teeth per Inch (TPI). The TPI is measured between the bottoms of the teeth. These hacksaw blades are a replacement for a 12" hack saw. Comes in a handy pack of 10.
