

AndyCraft Industrial Marker Fluoro Yellow

Product Images

Short Description

Andy Craft Industrial Marker Fluoro Yellow, Box of 12.

Description

AndyCraft non-toxic industrial marking crayons are used for waterproof marking in many industries such as concrete cutting, timber milling, steel fixing, tyre & conveyor marking, produce wax carton marking, leather marking, glass marking and asphalt marking.

The fluorescent colour range can also be used in automated docking machine applications.

These Andy Craft crayons are manufactured by combining pigments and fillers in molten paraffin wax, pouring the liquid into cast moulds, cooling, setting, trimming and packing.

The weight per crayon is approximately 35 grams and they are pointed cylindrical 12cm x 2 cm. They are available as boxes of 1 dozen.

The standard colour range stocked by Jaybro includes white and orange, as well as fluoro yellow and fluoro red.

- 120mm long x 20mm diameter
- Box of 12 fluoro yellow crayons
- Marks concrete, asphalt, waxed surfaces, glass, rubber and more
- Non toxic
- Other colours available
