

FORT-I-PAC 50mm (2") 450W Submersible Pump Kit

Product Images

Short Description

FORT-I-PAC submersible 450W pump for water transfer and drainage. The durable design and manufacturing of this unit enables it to stand up to the toughest of applications. This pump features auto operation with float switch and a spiral design to pass sand, silt and other solids. Sold as a kit including reducer, claw fitting and camlock.

Description

Applications for this submersible pump include site dewatering, basement and sump drainage. These pumps are also used for horticulture and water feature applications.

Manufactured with a stainless steel motor base and cast iron body, the FORT-I-PAC features a 50mm discharge port. If you have a need to transfer grey water, trade waste and general purpose drainage this is the ideal solution.
