

Timber Handle Trenching Shovel

Product Images

Short Description

Product Dimensions: Head Size 300 mm x 105 mm, Blade Thickness 2 mm, Overall Handle Length 1190 mm.

Description

This trenching shovel is high quality and ideal for digging in small, narrow and awkward areas like trenches. With a strong oak timber handle and carbon steel head, it stands up to heavy duty trade use. The narrow head is specially designed for clearing trenches for laying pipes and cables, or general drainage and trenching applications.

Features:

- Ideal for digging trenches, drains and other narrow tasks
- Head Size 300mm x 105mm
- Blade Thickness 2mm
- Overall handle length 1190 mm
- Strong Oak Timber Handle
- FSC Certified Handle
- Maximum Downforce to Handle 130kg+
- Carbon steel head
- Reinforced steel collar
