

GEOmasta Corflute Tree Guard 200 x 450mm

Product Images

Short Description

Folding triangular plastic tree guards, 450mm high x 200mm wide. Provides ideal protection for young plants.

Description

GEOmasta triangular Corflute Tree Guards are a heavy duty rigid plastic shelter for young trees, designed to protect against damaging winds, herbicide overspray and animal damage. They are very durable, quick and easy to install requiring only 1 tree stake, and can be reused if required. Designed to last 2-3 seasons in Australian conditions, meeting local council requirements. GEOmasta Tree Guards have small holes designed to allow plant breathability, while still offering superior protection. While they are suitable for many plant types, these guards are ideal for small native plants.

Stake Size required - 750mm x 11mm x 38mm. See Jaybro Code 30-3811750. Only 1 stake required per guard, saving time on site. Available in two sizes, 150mm wide or 200mm wide.

Ideal for:

- Plant Protection
- Revegetation
- Gardening

Installation Guide:

- Unfold flat packed tree guard
- Gently place over planted tree, ensuring branches are kept close to tree to prevent damage
- Open slots in back of guard, and insert 38mm x 11mm tree stake
- Taking care to avoid root damage, gently drive stake into soil with a lump hammer or mallet
- Ensure stake is inserted a minimum of 200mm into soil to prevent dislodgement by animals
