
TL-GCA-2 Gripple Cellgrip Anchor Pin, Black Plastic Head

Product Images

Short Description

Geofabric retaining pin, secures and stabilises geocells in TRP and slope stabilisation applications. 202mm long.

Description

CellGrip is designed to secure and enhance geocell performance in slope reinforcement and soil retention applications.

Features:

- Eliminates time and labour associated with carrying, deploying and hammering traditional J-hooks
- Clips into the perforated side walls of the Geocell
- Superior performance when compared to traditional rebar J-hooks, up to 9x the pull out force versus J-hooks
- Quick and easy to install with a standard electric drill – 5x faster installation process
- Can be installed to full depth without damaging the Geocell
- Actively anchors geocells and turf reinforcement mats against natural and sliding forces, reducing the need for heaving anchor and trenching
- Length: 202 mm
- Carton Qty: 120
