
SILTmasta SF5000 - Premium Sediment / Silt Fence

Product Images

Short Description

SILTmasta premium sediment silt fence 750mm x 100m. Premium SF5000 Silt Fence is a special, high quality, permeable, technical filter fabric that can be installed as an entrenched vertical barrier fence and is designed to intercept and detain runoff, trapping harmful silt through settlement and filtration before it leaves the site. The material consists of polypropylene tape yarn, ideal for long term applications.

Description

SILTmasta Sedi Fence is designed for protection of natural surrounding areas during the course of

earthworks and construction activities for a variety of civil engineering and domestic projects. Sensitive aquatic margins require protection from sediment run-off which can contaminate water-bodies due to nutrient overload.

SILTmasta SediFence is used to prevent such contamination by flanking exposed soils or bordering entire construction sites.

Premium SF5000 silt fence is a special, high quality, permeable, technical filter fabric that can be installed as an entrenched barrier fence, and is designed to intercept and detain runoff, trapping harmful silt through settlement and filtration before it leaves the site.

- Roll Width 750mm
- Roll Length 100m
- Weight: approximately 7.85kg per roll
- Pallet Qty: 62 rolls

Did you know that soil erosion, sediment and litter from construction sites can be major sources of storm water pollution and can cause significant harm to the environment. Anyone on a building site who does not comply with sediment control regulations can be prosecuted or issued with on-the-spot fines.

Additional Information

CODE	30-SF5000
U.O.M	Each
Weight	7
Brand	GEOmasta
Width	750 mm
Length	100 m
Swatch	no_selection
