

Steel Capped Concrete Pegs 900mm

Product Images

Short Description

Steel Capped Concrete Pegs 50 mm x 50 mm x 900mm

Description

These concrete pegs have a special steel cap to provide added strength for formworking. Primarily used to fix and support formwork, concrete stakes have a bevelled end for a secure steel collar fit. These hardwood timber pegs are capped with galvanized RHS. The steel cap is rebated slightly down from the top of the peg, to allow the top of the peg to flatten and 'mushroom'. Pegs measure 50 x 50mm and are available in various lengths from 450 to 1200mm.

Features:

- 50 x 50mm square
- Available in a range of lengths
- Galvanized collar for added strength
- Bevelled end
- Primarily used to support formwork
- Multitude of other uses
