
Gripple Drive Rod 2 1200mm

Product Images

Short Description

Used to drive ground anchors into the earth, the Gripple Drive Rod 2 1200mm is suitable for installation of Ground Anchor No. 2. Capable of penetrating the toughest soil.

Description

The Gripple Drive rod is used for the installation of the Terra-Lock and tree anchoring solutions, specifically for installation of Ground Anchor No. 2.

A quick and simple means of ground anchor installation, it is specially engineered for toughness and durability. The Gripple Drive Rod is capable of penetrating the toughest soil, and features specific head profiles to match anchors.

Available in 1200mm or 1800mm versions.
