

Gripple JackJaw Extraction Tool

Product Images

Short Description

Gripple Jackjaw multi tool post extractor, pole extractor, stake extractor, anchor extractor and drive tool extractor. For use with the Gripple Terra Lock TRM anchor system. **Please note this product is no longer available from Jaybro.**

Description

The Gripple Jack Jaw is a post extractor, pole extractor, stake extractor, anchor extractor and drive tool extractor.

It is perfect for slope reinforcement and soil retention and is commonly used in erosion control and soil stabilisation applications as well as concrete form fence, and in orchards and vineyards. The unique jaw and lever mechanism makes easy work of extraction - it pulls straight up, extracting without bending. This eliminates side loading and resulting strain on the operator's back. The Gripple JackJaw also eliminates heavy machinery and saves labour. It is made from hardened steel for enhanced durability.
