

# LED Variable Speed Limit Sign

## Product Images

## Short Description

Electronic Variable Speed Limit Sign with a 1080 mm x 1080 mm display. Programmable via 3G remote control, using Optraffic display software. Trackable on your smart phone via Google Maps.

## Description

LED Electronic Variable Speed Limit Sign with a 1080 mm x 1080 mm display. Ideal for temporary speed limit zones, this light up speed limit sign is programmable via 3G remote control, using Optraffic's user friendly display software. A versatile digital speed sign, it can be programmed to display white speed limit numerals in

a red circle, using extra bright 5mm LED lamps.

The variable speed limit sign enables tracking on your smart phone via Google Maps, and on site display control by PC. An IP65 rating ensures it is watertight and suitable for all weather environments. An optional speed radar turns this variable speed limit sign into a mobile speed advisory unit.
