

Vehicle Mount A Size Arrow Board 26 lamps, Double Sided

Product Images

Short Description

Size A double sided vehicle mounted arrow board, 12V powered with 26 individual lamps configured as 13 on each side. Includes controller module, roof mount assembly and hydraulic actuator. Amber flashing side mount beacons sold separately.

Description

This vehicle mounted arrow board provides high visibility at a low power consumption. Designed to handle the harsh Australian sun, it is a lightweight unit built tough to withstand day to day use. Featuring 26 total (13 each side) highly visible amber LED lights, this traffic arrow board is designed for use during road works to denote left arrow, right arrow, or double headed arrow.

Dual flashing amber lights can further promote safety and vehicle visibility (beacon brackets are included, however beacon lights are sold separately).

A single side-mounted hydraulic lift raises and lowers the unit using a control module positioned in the cab. When lowered, the streamlined design allows for minimal wind resistance for increased safety. In folded travelling position, the board measures 215mm overall height.

These directional arrow boards are high quality, fully featured and ideal for mobile traffic management, traffic control, roadworks, TMA vehicles, emergency repair crews, convoys and crash cushion applications.

Features:

- Low profile - only 215mm high when folded down
- 860 mm overall height when in the raised position
- Automatic dimming LED lamps
- LED visibility range up to 860 metres
- Simple wiring connections between board and controller
- Aluminium black powder coated finish
- A Size Board Dimensions: 1260mm wide x 650mm high
- Double sided configuration - 13 lamps on each side
- Suitable for mounting on trucks and utes
- 12V Power
- Weighs 38.6kg
- IP56 waterproof rating
- Lamps and shrouds are easily replaced if necessary
- Compliant with AS/NZ Standard AS4192 Illuminated Flashing Arrow Signs; MUTCD Compliance
- Made in an ISO9001 Accredited manufacturing facility
- High output LED lamps provide excellent long range visibility
- Includes roof mounting assembly
