

Tensioning Tool for Poly Woven Strapping

Product Images

Short Description

Tensioner for woven poly strapping. This polywoven tensioner makes it easy to strap cartons and pallets with plastic strapping.

Description

This high quality, robust tool is ideal for medium and high level users. Designed specifically for use with polywoven strapping, it features a comfort grip and is constructed from rugged metal for longevity on site and in the warehouse.

The spring action tensioning tool makes it easy to pull poly pallet strapping tight and secure, ensuring your packages and bundles stay together. When used with our poly strapping and poly buckles, it is part of a fast effective wrapping system.
