

# General Purpose GP Cement Mix, Bulka Bag 1000kg

## Product Images

## Short Description

---

General Purpose Cement is a cost-effective, high-quality building material. The level of consistency and versatility of General Purpose cement makes it an ideal choice in virtually all construction applications. Supplied in a 1000kg bulker bag ideal for large projects. GP Cement is supplied in a tough yet lightweight polypropylene bulker bag (FIBC) that can be handled by crane, Hiab or forklift, making it ideal for awkward or restricted work areas.

## Description

---

Cement Australia General Purpose Cement fully complies with the requirements for Type GP cement in Australian Standard AS3972 - General purpose and blended cements. General Purpose Cement is a cost effective, high quality building material. The level of consistency and versatility of General Purpose cement makes it an ideal choice in virtually all construction applications.

### **Applications:**

- Domestic construction including concrete slabs, driveways, foundations
- Structural concreting including high rise buildings, bridges, dams, airports, wind farms and warehouses
- Mining applications
- General Purpose Cement can be used as a cementitious binder in a broad range of applications including concrete, mortars, renders, grouts. Where specific properties such as rapid setting or high early strength are required a more specialised cement should be considered.

### **Features:**

- Versatile product to suit a wide range of applications
- Consistent and reliable quality
- Conforms to Australian Standards AS3972 General purpose and blended cements

### **Compatibility:**

- General purpose cement is compatible with admixtures that comply with AS1478 Chemical admixtures for concrete
- Fly ashes complying with AS3582.1 Supplementary cementitious materials for use with general purpose and blended cement: Fly Ash
- Ground granulated blast furnace slags complying with AS3582.2 - Supplementary cementitious materials for use with General Purpose and blended cement: Slag - ground granulated iron blast furnace
- Other cements complying with AS3972 - General purpose and blended cement
