

# Max Frank Tubbox Column Former Formwork

## Product Images

## Short Description

---

Max Frank Tubbox column formers offer a lightweight, easy to handle formwork, without the use of release agents, that can be easily assembled and dismantled. Plus, it is easy for multiple columns to be concreted sequentially, speeding up the construction cycle. Available in a wide range of profiles and types; please contact our team for more information.

## Description

---

Tubbox® and Tubbox® Multi column formers from Max Frank offer you a low-cost alternative to conventional formwork systems. Tubbox® column formers can be used to create columns of virtually any geometrical shape: round, square, octagonal or irregular shapes. They are then easily opened up using the in-built rip-cord and then rapidly removed or left in place as temporary protection. Full handling and installation guidelines are supplied with each former.

The special feature of the Max Frank Tubbox® Multi circular column former is the frequent re-usability of the formwork. This makes Tubbox® Multi a very economical alternative to conventional circular column formers. The surface of the finished reinforced concrete columns is smooth with occasional blowholes.

No matter whether you require polygonal capitals, unusual column shapes and bases or special shapes with textured surfaces, Max Frank Tubbox will supply any solution tailor made to your ideas. The system offers a lightweight, easy to handle formwork, without the use of release agents, that can be easily assembled and dismantled. Plus, it is easy for multiple columns to be concreted sequentially, speeding up the construction

cycle.

Features and Benefits

- Economical due to high frequency use
- From 250 mm all diameters are possible on request
- Easy to handle and transport thanks to low weight
- Low volume saves freight and storage costs
- Special dimensions and special shapes on request
- Braces and brace corners are possible
- Simple formwork stripping
- Low amounts of waste during formwork operations
- Easy handling in confined spaces

Variations Available

- Circular column formers Tubbox multi - column jacket
- Circular column formers Tubbox multi - multiple use
- Surface finish options including spiral, lined, blowhole free and profiled
