

Max Frank Square Concrete Spacers

Product Images

Short Description

Max Frank Square Spacers maintain accurate concrete cover in slab heights from 20mm up to 100mm. Made from cast concrete they come complete with wire in various pack sizes and quantities. Choose your required size from the options below.

Description

Max Frank Square Spacers are ideal for concrete applications that require precision load transfer. They have a high compressive strength, and present no deformation in heat or cold. Concrete cover is accurately maintained when using these square spacers, that remain in position during formwork erection and concreting.

Ideal for impermeable concrete, Max Frank square spacers guarantee no hairline cracks between the spacer and the concrete. Made from square cast concrete with wire they are available in 20mm up to 100mm sizes.

Features:

- High compressive strength, no deformation in heat or cold, concrete cover accurately maintained
- Spacers remain in position during formwork erection and concreting
- Ideal for impermeable concrete, no hairline cracks between the spacer and the concrete
- Cast concrete with wire
- Shape: Square
