

Banana Bar Concrete Spacer Bar 50mm x 330mm

Product Images

Short Description

Banana Bar Concrete Spacer Bar 50mm x 330mm

Description

Max Frank banana spacers are a fibre concrete spacer designed to ensure correct concrete cover before and during concreting. They are characterized by high compressive strength and excellent chemical and physical resistance. They have an excellent bond with concrete and offer no hairline cracks.

Features:

- With notches for horizontal applications
- Use with mesh reinforcement
- Manufacturing length 33 cm specially for R-mats and manufacturing length 25 cm specially for Q-mats
- Stable, non-tipping – simple to install
- Designed for use with exposed / architectural concrete due to reduced interface with formwork
