

Folding Bi-Pod Legs

Product Images

Short Description

Designed for use with boxed edge road signs, these bi-pod sign legs fold away for convenient storage.

Description

This temporary folding bipod frame is designed for use with boxed edge temporary traffic signs. They are lightweight yet very stable in high wind areas. This metal folding Y frame type is ideal for signs that are often moved and relocated, as the folding design makes it easy to pack away. When set up, the sign legs create a stable base for road and traffic signs.
