

# **Folding Bi-Pod Legs**

#### **Product Images**

## **Short Description**

Designed for use with boxed edge road signs, these bi-pod sign legs fold away for convenient storage.

## **Description**

This temporary folding bipod frame is designed for use with boxed edge temporary traffic signs. They are lightweight yet very stable in high wind areas. This metal folding Y frame type is ideal for signs that are often moved and relocated, as the folding design makes it easy to pack away. When set up, the sign legs create a stable base for road and traffic signs.
