

# Max Frank Pecafil Permanent Formwork

## **Product Images**

## **Short Description**

Pecafil replaces conventional timber or steel shuttering for the in-ground construction of pile caps and ground beams, to provide fast and accurate formwork installation. Pecafil is suitable for a range of applications, using standard or custom-manufactured elements. Please contact us with the specific sizes you require.

### **Description**

Max Frank Pecafil® formwork saves you time and takes the hard work out of construction. Pecafil is the tried and tested solution for today's construction professionals. The specially manufactured material is constructed from a steel mesh in a wide range of sheet and strip sizes with various wire diameters, shaped to meet your needs. Its distinctive yellow outer layer is heat-shrunk polyethylene, made from non-toxic, naturally occurring hydrocarbons.

Pecafil replaces conventional timber or steel shuttering for the in-ground construction of pile caps and ground beams, to provide fast and accurate formwork installation. Pecafil is suitable for a range of applications, using standard or custom-manufactured elements.

#### **Features and Benefits**

- Site drawings are quickly transformed into factory produced panels
- A wide range of standard and bespoke panels and forms for virtually all applications
- Saves time and costs on blinding, labour and spoil removal
- Curved or complicated foundation forms can easily be produced on-site
- No stripping, cleaning or return of the formwork
- Light enough for just one person to handle no need for hoists, ready for rapid assembly
- Fast and easy to install can be cut with basic tools
- Re-use your Pecafil forms, depending on the specific site conditions and construction method no waste Reduced working space requirement

#### Sizes Available:

• 600mm wide up to 1800mm wide

- 2250mm long sheets
- Grid dimensions 150 x 75mm
- Yellow foil
