

Consystex Round Column Formwork System, Standard Spiral Finish

Product Images

Short Description

Consystex Standard - Spiral Finish - Max Height: 5m

Description

Round Tube Formwork Concrete Columns are manufactured by a revolutionary spiral system patented by Consystex.

Consystex's round tubes are easy to set up, lightweight and are extremely strong, and are flexible for various applications. Each diameter offers an option of standard, medium and heavy depending on the required length which allows no restriction in height. Consystex columns are simple to set up and require minimal bracing, depending on the pouring method used, thereby saving on time and labour.

Custom manufactured, these pink column tubes can be ordered to exact mm. Columns can be marked so

that they can be dropped straight in when getting to site. They can also be cut on site.

Features:

- Lightweight
- It is environmentally friendly made up of non-hazardous materials which all can be recycled
- It is weatherproof and can also be designed for underwater applications not affecting its strength
- It can be offered in a range of desired finishes including spiral lined and textured
- Spiral Finish - Class 3 finish gives a minimal spiral mark
- Lined Finish - Class 2 results in a smooth off-form concrete
- Manufactured in Australia
