

Virasan Anti-Viral Sanitiser, Hospital Grade - 5L

Product Images

Short Description

5L container of Virasan Anti-Viral Hospital Grade Sanitiser disinfectant. Containing hydrogen peroxide, ViraSan is proven and effective in mitigating the threat of germs, viruses and a range of bacteria. Safe to use on most surfaces such as metal, glass or plastic and in hard to reach crevices. Ideal for disinfecting hard surfaces. **TGA approved to kill COVID-19 (SARS-CoV-2) in 60 seconds.**

Description

Vira San is now a TGA approved product for COVID-19. Vira San is proven to kill COVID-19 (SARS-CoV-2) in 60 seconds, making it not only one of the fastest acting disinfectants, but one of the most cost-effective (up to 10x faster than competitors). The speed and cost-efficiency of the product is unmatched and the approval comes at a crucial time in our fight against the virus.

VIRA SAN is a hard surface disinfectant that can either be sprayed onto a surface or be used in a ULV cold fogger to disperse throughout a room or designated area. Simply use the product undiluted and allow the machine to disperse solution evenly throughout the designated area. Always refer to the SDS before use, and note this product should not be heated.

Vira San is a specially formulated non-corrosive disinfectant, which is effective in deactivating viruses at their core. Containing hydrogen peroxide, ViraSan is proven and effective in mitigating the threat of germs, viruses and a range of bacteria. Safe to use on most surfaces such as metal, glass or plastic and in hard to reach crevices. Ideal for disinfecting hard surfaces such as seating, armrests, tray tables, galley and bathroom surfaces, counters, tables, door knobs, light switches, handles, desks, toilets, taps and sinks.

Directions for use: wear disposable gloves and safety glasses. Spray undiluted on the surface to be cleaned, leave for one minute and wipe off. Refer to the MSDS for more information.

Proven to Kill:

- Effective against COVID-19 (SARS-CoV-2) in 60 seconds
- Tested against coronavirus murine hepatitis virus strain 1 (MHV-1) a proven surrogate to the coronavirus family
- 99.999% of bacteria: *S. aureus*, *Pseudomonas aeruginosa*, *Salmonella choleraesuis*

Features:

- TGA approved - kills COVID-19 (SARS-CoV-2) in 60 seconds
- VIRA SAN has surpassed the requirements by the AOAC and the nationally recognised Disinfectant Test, Option B (dirty conditions). It is a TGA approved product - ARTG entry 340431
- Ideal for hard surfaces such as tables and chairs, door knobs, light switches, toilets, escalators and elevators
- Food safe, can be used in kitchen areas
- For hard surfaces, simply spray, wait and wipe

Easy to use:

- If the surface is visibly dirty, pre-clean soiled areas to be disinfected. Rinse with a damp cloth and allow to air dry. Wear gloves and spray undiluted on the surface. Leave it on surface for 60 seconds to kill COVID-19. Wipe off with cloth in one continuous direction.
