

Gas Cylinder Trolley

Product Images

Short Description

Gas cylinder trolley suits one size 'G' Oxygen and one size 'G' Acetylene gas cylinder. This unit is designed for the safe handling of gas cylinders around the work site by forklift, crane or by manual pushing.

Description

This versatile gas cylinder trolley is designed for the safe handling of gas cylinders around the work site by forklift, crane or manually wheeled with push handles. This makes it a flexible solution on sites where manoeuvring a traditional trolley may be difficult. Designed to carry G size oxy and acetylene cylinders, it enables welders to easily move gas around site safely.

Features:

- Designed to carry one size 'G' Oxygen and one size 'G' Acetylene gas cylinder
- Ideal for use on construction and mining sites where manoeuvrability is limited
- Load binder allows cylinders to be securely fastened in position
- Fitted with push handles and 400mm diameter pneumatic tyres for manual transport
- Integrated forklift pockets and crane lifting chain sling provided
- Orange enamel paint finish

- Working Load Limit (WLL) 250kg
- Unit Weight 55kg
- Fork Pocket Size 160 x 45mm
- Fork Pocket Centres 480mm
