

Vertical Aerosol Storage Cage, 300 Cans

Product Images

Short Description

This lockable ventilated steel aerosol storage cage helps you to meet safety requirements on site by responsibly storing flammable aerosol cans including spray paints, lubricants, cleaners, adhesive and degreasers. Stores up to 300 cans.

Description

Nearly all aerosol cans are Class 2.1 Flammable Gases and Dangerous Goods, and therefore should be stored correctly on site using cabinets such as our range of aerosol storage cages that comply with AS4332.

These cages are manufactured specifically to safely store high pressure aerosol cans. These cages are engineered to meet the requirements of the Australian Standard: AS4332-2004 - "The storage and handling of gases in cylinders". By using one of these storage cabinets on site you can ensure you meet WHS requirements and safely store flammable aerosol cans including spray paints, lubricants, cleaners, adhesive and degreasers.

These Australian Made aerosol can storage units are made to high standards, fabricated from heavy duty sheet steel and finished with a high build powder coat for corrosion protection. All aerosol can cages have perforated walls to provide projectile protection in the event of a workplace fire.

Jaybro's range of aerosol storage cages offers economical, secure, and relocatable solution for storing aerosol cans safely. Available in a range of sizes, there are options available to suit from 18 cans up to as many as 625 cans. Vertical and horizontal options are available to suit different space requirements.

Features:

- Perforated walls to provide natural ventilation and projectile protection
- Bolt down plates to provide extra stability and security
- Padlock-ready doors for controlled access
- Safety signage to warn workers of flammable gas storage
