Product Images

Short Description

Galvanized Blue-Tip Screw Bolt anchors are one-piece units featuring a finished hex head formed with an integral washer. Suitable for a wide range of trades and applications. Choose your size from the options below.

Description

Powers Hex Head Blue Tip SCREW-BOLT anchors are one-piece units featuring a finished hex head formed

with an integral washer. Offering fast installation with immediate high strength loading, they are suitable for any trades including carpentry, formworking, tie down applications, construction and more.

Powers galvanized screw bolt anchors are versatile and adapted for use in a variety of base materials, including concrete, block, stone and brick, lightweight concrete and hollow core concrete.

Features:

- Hex Head Galvanised corrosion resistant
- Ratchet teeth on the underside of the hex washer head lock against the fixture
- Removable and vibration resistant
- Patented dual lead thread and a chamfered tip
- Fast installation with Immediate high strength loading
- Specially matched to the clearance hole, the need for layout or hole spotting is eliminated
- No expansion forces
- Can be installed closer to the edge than traditional mechanical anchors
- Can be installed at a shallower embedment reducing the chance of striking reinforcing bars or embedded cables
