
Boxed Edge Road Sign - Chevron 600 x 600mm

Product Images

Short Description

Class 1 Reflective sign with large right facing chevron arrow. This square directional sign features a boxed edge made from aluminium for strength and stability in rugged roadwork environments.

Description

Made from strong aluminium with a Class 1 Reflective finish, this road sign is great for indicating directional changes during roadworks, highlighting tight road curves or adding additional visibility to road barriers.

An easily recognisable right facing black chevron is most effective when used in a series, for example demarcating traffic flow around tight bends.

It's compact 600 x 600 mm size makes it suitable for applications where space is at a premium. Jaybro also stocks complementary chevron signage including a 1500 x 450 mm three chevron sign, and 1200 x 900 mm swing stand signs which are easy to erect and transport for temporary road and traffic works.

Jaybro can help ensure hazards are minimised for motorists by printing custom message signs - Jaybro is a leader in custom printed Class 1 Reflective, Class 1W, Class 1X Fluoro and other signage. Contact our customer service team for more information on custom orders to complement your Chevron sign.
