

Large Capacity Flammable Liquids Storage Cabinet, 450L

Product Images

Short Description

This heavy duty safety cabinet is designed for storing larger quantities of Class 3 flammable liquids up to 450 litres in total.

Description

The Large Capacity 450 litre Flammable Liquids Storage Cabinet is a heavy duty safety cabinet for storing larger quantities of Class 3 flammable liquids. This chemical store is 25% stronger than standard cabinets for flammable liquids, and will safely isolate your flammables from ignition sources, oxidisers and other Dangerous Goods. It features twin hydraulic-action doors which close automatically meaning no jamming or sparking; high quality 2-pack polyurethane finish; warning placards; and a compliant spill sump (140 litres).

Features:

- Manufactured from 25% heavier materials than minimum requirement
- Vent openings with built-in flash arrestors [for mechanical ventilation systems]
- Unique spark-proof, self latching locking system with lockable handle

- Self-closing close-fitting doors
- Genuine sump capacities maintained with a fixed suspended perforated floor
- Drain plug to spill containment sump for safe disposal of spills
- Continuous stainless steel pin hinging for maximum strength and reliability
- Safety signs and directions that comply with AS1216 and AS1319
- Designed and manufactured in full conformance to AS1940-2017 - The storage and handling of flammable and combustible liquids
- Manufactured in Australia

Specifications:

- Internal Dimensions 1608mm high x 1302mm wide x 718mm deep
- External Dimensions 1880mm high x 1386mm wide x 804mm deep
- Weighs 220 kg
- 6 Shelves
- 140L Sump Cap
