

Large Capacity Flammable Liquids Storage Cabinet, 850L

Product Images

Short Description

This heavy duty safety cabinet is designed for storing larger quantities of Class 3 flammable liquids up to 850 litres. Fits a range of different sized containers including large drums.

Description

The Large Capacity 850 litre Flammable Liquids Storage Cabinet is a heavy duty safety cabinet for storing larger quantities of Class 3 flammable liquids. Safely isolate fuel, solvents and lubricants from ignition sources, oxidisers and other Dangerous Goods in this hard-wearing chemical cabinet that is built 25% stronger than standard. It holds a range of different sized containers including large drums. Features a 270 litre spill containment sump, twin hydraulic action doors which close in sequence meaning no jamming or generating sparks; L-handle door fastener, vent openings and built-in flash arrestors that fit your mechanical ventilation system.

Features:

- Manufactured from 25% heavier materials than minimum requirement
- Vent openings with built-in flash arrestors [for mechanical ventilation systems]

- Unique spark-proof, self latching locking system with lockable handle
- Self-closing close-fitting doors
- Genuine sump capacities maintained with a fixed suspended perforated floor
- Drain plug to spill containment sump for safe disposal of spills
- Continuous stainless steel pin hinging for maximum strength and reliability
- Safety signs and directions that comply with AS1216 and AS1319
- Designed and manufactured in full conformance to AS1940-2017 - The storage and handling of flammable and combustible liquids
- Manufactured in Australia

Specifications:

- Internal Dimensions 1608mm high x 2500mm wide x 718mm deep
- External Dimensions 1880mm high x 2854mm wide x 804mm deep
- Weighs 375 kg
- 6 Shelves
- 270L Sump Cap
