Product Images

Short Description

Available in white, these microporous, anti-static, breathable coveralls have been manufactured to protect against hazardous dust, dry particles, light spray and liquid splashes. Size 2XL.

Description

These microporous, anti-static, breathable coveralls have been manufactured to protect against hazardous dust, dry particles, light spray and liquid splashes.

The structure of the material allows sweat vapour to pass from inside to outside keeping the wearer comfortable and cool during use. Some applications include environmental remediation, chemical and paint spraying, chemical manufacturing, clean rooms, animal care and crime scene investigation.

- Lightweight & breathable
