

Fire Extinguisher 2Kg ABE - With metal vehicle bracket and hose

Product Images

Short Description

2kg ABE powder fire extinguisher with hose can be vehicle-mounted or wall mounted for ease of use in emergency situations to put out or contain a fire. **FIRE EXTINGUISHERS COME WITH TAG READY FOR INSTALLATION AND ARE CERTIFIED TO AS/NZS 1841.**

Description

ABE Powder is a versatile multi-purpose extinguisher which is used to extinguish: Class A fires (solids - waste, timber, etc), Class B fires (flammable liquids, etc), Class E fires (electrical). Featuring a rugged steel cylinder and rugged handle and trigger, this ABE fire extinguisher is designed to perform when and where you need it. Using a fire extinguisher on the wrong class of fire can cause the fire to spread. Make sure the extinguisher matches the hazards in the area it will be installed. Powder fire extinguishers can be identified by a white strip around the top of the cylinder. They are widely used for ABE fires, and they work by discharging a fine powder that absorbs the fires fuel source.

Suitable for:

- Class A fires (solids - waste, timber, etc)
- Class B fires (flammable liquids, etc)
- Class E fires (electrical)

Features:

- Metal vehicle bracket
- 2kg size
