

Solar Powered CCTV Camera - Surveillance System

Product Images

Short Description

CCTV Camera for high performance remote monitoring of your construction site or project. The Solar CCTV Surveillance System from Fortress Fencing is a remote-view-enabled, standalone surveillance solution, ideal for areas without network or power infrastructure. Camera offers 4G connectivity powered by a 120W solar panel. Please contact the Fortress Fencing team for further information on our CCTV range.

Description

Deliver surveillance to any location with the SLR-B Series Solar CCTV Surveillance Systems from Fortress Fencing. These remote-view-enabled, standalone surveillance solutions are perfect in areas without network power or existing infrastructure, such as remote work sites, new greenfield developments and subdivisions, mine sites and remote construction sites. They are also ideal for use in black spots without reliable network infrastructure, and for temporary security at events.

The camera itself - the 4.0MP Mini AI PTZ Dome - offers a 2.8 - 12mm motorised lens, 4x optical zoom, pan and tilt function and video analytics as well as a 'virtual tripwire' for monitoring gates, carparks and certain areas that can be virtually mapped out. This provides excellent perimeter protection to identify people and vehicles, helping to keep your property safe from theft.

Solar panels:

A 120W monocrystalline silicon solar panel offers up to 21% efficiency. The solar panels are IP65 rated with wind resistance up to 65m/s. The solar panel units features a 50W LED area light with microwave motion detection, which can be customised to your specifications. The entire system is powered by a rechargeable Lithium Iron Phosphate (LiFePo4) battery (500Wh). The LED area light and the LiFePo4 battery are all combined into the one solar panel unit.

Connectivity:

This security camera system works with 4G connectivity, using a high speed 3G/4G modem router for remote view from almost anywhere (SIM card required).

Easy standalone mounting system:

This unit does not include a pole or base plate, however the camera mounting assembly is included. This mounting kit comprises a backing box and triple pole clamp which fits the 03-SLRPOLH pole and 03-SLRPOLCNC concrete block mount, available separately.

Features:

- Efficient 120W monocrystalline silicon solar panel
- National coverage* remote view using 3G/4G modem OR long range 5.8GHz WiFi bridge for remote view
- Lasts up to 2-3 days from full charge in cloudy conditions
- 500Wh lithium iron phosphate battery (LiFePo4)
- Built-in 50W microwave motion sensor LED area light
- ~50~60mm pole mount diameter (pole not included)
- Surveillance grade 128GB microSD card included
- 4 year warranty

* Note for 3G/4G options: SIM card not included. Coverage dependent on carrier capabilities.
