Container-mounted shelters

Product Images

Short Description

Container-mounted shelters - constructed from high strength, woven polyethylene fabric tensioned over heavy-duty, lightweight steel framework, they've equivalent strength to conventional structures.

The shelters come in kit form with detailed assembly instructions, meaning they can be self-installed. Most sizes can be installed in one day.

Choose from a range of sizes below.

Description

Flexible

These durable shelters can be mounted on the inside or outside of common shipping containers. Designed to suit your specific space and storage requirements.

Installation

Supplied in kit form with layout plans, parts lists, and easy step-by-step assembly instructions.

Versatile

Available in a range of sizes; from 6 -17m wide, mounting to standard 20ft or 40ft containers. The versatile nature of these shelters allows for extra length by joining two shelters (e.g. join two 12m x 12m shelters to create one 12m x 24m shelter)

Relocatable

Uniquely engineered to be permanent and designed to be relocatable. These shelters meet strict Australian quality standards equipped for up to wind region C.
