

EROmasta SeedMat3 2m x 50m Green

Product Images

Short Description

3 Layer Seedmat Turf Reinforcement Mat. 2m x 50m Roll.

Description

EROmasta™ SeedMat is a synthetic turf reinforcement mat, designed and engineered to protect soil from

erosion and provide an environment that encourages rapid vegetative root development. It is a three dimensional tri-layered mat manufactured from polyethylene. It is constructed using a base of high tensile layers of net bonded to upper layers to form a cusped surface designed to trap soil particles and seeds.

EROmasta™ SeedMat creates an immediate and long term defence against natural erosion due to wind, rain and flooding. Top soil and seed is applied on top of EROmasta™ SeedMat

Synthetic erosion mats and blankets have become a practical choice for cost efficient, immediate and permanent solutions to help stabilisation and control erosion. EROmasta™ products offer ecologically sensitive substitutes to alternate solutions.

Additional Information

CODE	TRM3-2/50
U.O.M	Roll
Weight	250
Brand	GEOmasta
Colour	Green
Length	50 m
Swatch	no_selection
