

mastaTEX® Concrete 80MPA Roll 12mm , 2.5m x 20m

Product Images

Short Description

mastaTEX® Concrete 80MPA Roll 12mm

Description

mastaTEX® Concrete is a needle punched composite, consisting of concrete-sand mix, embedded and fixed between two layers of geo-textile. It is much faster and cheaper to install than conventional materials, and our strict quality control of raw materials makes the finished product fail-proof. It provides a substrate for direct applications of a thin protective layer of regular concrete, which may be used in various weather conditions. The fabric is fastened to an outer part with nails, which provides a solid water-resistant surface stabilisation, further braced thanks to internal reinforcing fibres.

Additional Information

CODE	MTC80/12/2.5/20
U.O.M	Roll
Weight	250
Dimensions	2.5 x 20 m
Swatch	no_selection
