
EROWeb® Multi Head (SW Strata Multi Head)

Product Images

Short Description

EROWeb® Multi Head are used along with the EROWeb pins when installing geofabrics.

Description

EROWeb® Multi Head pin head attachments are used along with pins for installing EROweb and other erosion control fabrics. Designed to add additional support to three dimensional mats and geotextiles, the multi head is placed onto the retaining pin allowing the EROweb to slide into the clip. This helps hold the honeycomb structure of the EROweb in the correct position, supporting it during installation.

- One Multihead is required per EROWeb pin
- Made from durable plastic material
- Adds additional support to 3D and honeycomb structured geotextiles
