

Hoppt Forward Plate Compactor 95kg

Product Images

Short Description

95kg compactor with Honda Gx160 4-Stroke Petrol engine. Ergonomically designed with operator comfort in mind.

Description

Hoppt Forward Plate Compactor features a compact yet robust design with a low hand-arm vibration handle. Offering a choice of compacting force, it also has different plate sizes depending on the application and material being compacted. Especially designed for use in narrow trenches, it is also perfect for interlocking blocks, landscaping, footpath construction and maintenance, and small to medium scale patchwork. Additionally, Hoppt Forward Plate Compactor is ideal for repair and maintenance of sand, gravel and asphalt in restricted area and along obstacles such as curbs.

Comfortable to use with a range of features including:

- Honda Gx160 4-Stroke Petrol
- Water tank for sprinkler system
- Low hand-arm vibration handle for greater operator comfort
- Easily accessed throttle control
- Folding handle designed for easy storage and transportation
- Protective cover with a smudge-free look to protect and prolong life span of belt
- Wheels for greater mobility

- Lifting and handling point for easy transportation
- Reinforced base plate for added durability
