
Extendable Domed Top Survey Tripod

Product Images

Short Description

Aluminium domed top surveyors tripod, Adjustable height with expandable legs

Description

Aluminium domed top surveyors tripod. Heavy duty design for use on civil and construction work sites. Adjustable high with extendable aluminium legs providing excellent stability.

Ideal for use with IMEX heavy duty series Dumpy Levels. Jaybro also supply Telescopic 'E' Face staves and

other survey equipment.

Domed top aluminium tripod made from strong yet lightweight aluminium. Designed for use with a dumpy level or manual levelling laser, the tripod has telescopic legs tipped with spikes to allow it to be anchored into soft ground. This provides the most stable platform to mount your laser level. The domed top has the advantage of allowing you to roughly level off the device on the dome before you tighten up the locking screw.
